International aplication No.

PCT/KR2003/002703

I.	Basis	of the report
1.	With	regard to the elements of the international application:*
	X	the international application as originally filed
		the description:
		pages, as originally filed pages, filed with the demand
		pages, filed with the letter of
		the claims:
		pages, as originally filed pages, as amended (together with any statment) under Article 19
		pages, filed with the demand
		pages, filed with the letter of
		the drawings:
		pages, as originally filed pages, filed with the demand
		pages, filed with the letter of
		the sequence listing part of the description:
		pages, as originally filed pages, filed with the demand
		pages, filed with the letter of
2.	the i	regard to the language, all the elements marked above were available or furnished to this Authority in the language in which international application was filed, unless otherwise indicated under this item.  se elements were available or furnished to this Authority in the following language English which is the language of a translation furnished for the purposes of international search (under Rule 23.1(b)). the language of publication of the international application (under Rule 48.3(b)).  the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/ or 55.3).
3.	Wit pre	th regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international liminary examination was carried out on the basis of the sequence listing:
	님	contained in the international application in written form.
	믐	filed together with the international application in computer readable form.  furnished subsequently to this Authority in written form.
	片	furnished subsequently to this Authority in computer readable form
		The statement that the subsequently furnished written sequence listing does not go beyond the disc losure in the
		international applicationas as filed has been furinshed.  The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.
4.		The amendments have resulted in the cancellation of:
		the description, pages the claims. Nos.
		the claims, Nos. the drawings, sheets
5.		This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box(Rule 70.2(c)).**
*	in thi	acement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to s opinion as "originally filed." and are not annexed to this report since they do not contain amendments (Rules 70.16 10.17).
**	Any i	replacement sheet containing such amendments must be referred to under item I and annexed to this report.

International aplication No. PCT/KR2003/002703

V.	V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1.	Statement					
	Novelty (N)	Claims	1-2	YES		
	·	Claims		NO		
	Inventive step (IS)	Claims	1-2	YES		
		Claims		NO		
	Industrial applicability (IA)	Claims	1-2	YES		
		Claims		МО		
				_		

2. Citations and explanations (Rule 70.7)

The following documents have been considered for the purpose of this report:

D1: JP 12-295996 A (KYOWA HAKKO KOGYO CO., LTD.), 24 Oct. 2000.

D2: KR 2002-57470 A (C.J. CORP.), 11 Jul. 2002.

## 1. Novelty and Inventive Step

Claims 1-2 relate to a special strain, *Corynebacterium ammoniagenes* CJXOL 0201 (KCCM 10447) having a resistance to oligomycin and producing 5'-xanthylic acid; and a method of producing 5'-xanthylic acid characterized by using the same microorganism.

In D1 and D2, a new microorganism, *Corynebacterium ammoniagenes*, for the production of 5'-xanthylic acid and a method for producing 5'-xanthylic acid using the same are described.

Compared with the present invention, none of the above-mentioned prior art documents disclose the special strain of the present application and the method of producing 5'-xanthylic acid using the same microorganism. In addition, the present invention is not considered to be easily invented by a person skilled in the art by using the teachings of D1 and D2.

Therefore, the subject matter of claims 1-2 of the present application comply with the requirements of novelty and inventive step under PCT Article 33(2) and (3).

## II. Industrial Applicability

There is no reason for forming a negative opinion about the industrial applicability of this invention. Consequently, claims 1-2 appear to meet the requirement of PCT Article 33(4).
